

The logo features the acronym 'IAAB' in large, bold, white, sans-serif capital letters. The letters are positioned over a background of three overlapping circles: a light gray circle on the left, a dark gray circle on the right, and a bright orange circle at the bottom. The orange circle is partially obscured by the 'IAAB' text.

Training to IAB Specialist in Movement Disorders

In movement disorders new treatments and combined therapies are indicated frequently. Increasingly health professionals are part of this complex therapy. The approach of improving and promoting the quality of life and adopting the therapy to the individual needs of the patient, also requires the involvement of relatives. **Through this training design, the ability to obtain the multidisciplinary approach in the treatment of movement disorders should become part of the own thinking and practice.**

Based on a **certificated and patented** curriculum and concomitant training possible!

The **certification of the training by CME authorities for physicians, nurses and other health professionals** allows an advanced use of your skills and more safety in your chosen field of activity.

For medical students and health professional in training is possible to take part in the education program to **IAB Specialist in Movement Disorders (SMD-IAB)**, but the title **SMD-IAB** is linked with a already completed therapeutic training.

Structure of the courses

New Patented Training

The **curriculum of the basic training** is composed as follows:

a selection of basic and structural and special courses of the issues:

Spastic Syndrome
Dystonia
Parkinson's Disease
and additionally

Training Modules for Interdisciplinary Therapy of Movement Disorders based on Cooperation of Netz3L – Hamburg bildet! / IAB Academy

Since 2018, IAB Akademie offers [12 further education modules](#) (WbB) developed in the project "Netz3L – Hamburg ist!".

In addition, Dr. Fereshte Adib Saberi obtained a certificate for the design of competence-oriented curricula as an instructor.

Background

German and European developments in education policy, the authorities, the job center team.arbeit.hamburg and the Employment Agency in Hamburg have agreed to create continuing education modules according to Hamburg-wide uniform standards. **The aim was to ensure quality, comparability and transparency in education and training.**

This project was funded by the European Social Fund ESF and Hanseatic City of Hamburg.

The modules include the interdisciplinary therapy of neurological movement disorders, dystonia, parkinson's disease and spastic conditions in each three levels (basic module, superior module, instructor module).
